

Daily Multiplication Practice

"Repetition creates the master." – Cesar Millan

Monday

$6 \times 0 = 0$				
$6 \times 1 = 6$				
$6 \times 2 = 12$				
$6 \times 3 = 18$				
$6 \times 4 = 24$				
$6 \times 5 = 30$				
$6 \times 6 = 36$				
$6 \times 7 = 42$				
$6 \times 8 = 48$				
$6 \times 9 = 54$				
$6 \times 10 = 60$				

Tuesday

$9 \times 0 = 0$				
$9 \times 1 = 9$				
$9 \times 2 = 18$				
$9 \times 3 = 27$				
$9 \times 4 = 36$				
$9 \times 5 = 45$				
$9 \times 6 = 54$				
$9 \times 7 = 63$				
$9 \times 8 = 72$				
$9 \times 9 = 81$				
$9 \times 10 = 90$				

Solve each word problem using multiplication. Write the number model and product for each.

Wednesday

<p>A store owner was buying uniforms for his employees. If each of his three stores needed nine uniforms how many uniforms would he need?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>An employee at a construction site earns nine dollars an hour. If he works nine hours in one week, how much money would he have earned?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>The roller coaster at the state fair costs six tickets per ride. If six friends were going to ride the roller coaster, how many tickets would they need?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>A pet store sold five gerbils in one week. If each of the gerbils cost nine dollars, how much money would they have made?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>A large order of fries at the soda shop costs six dollars. How much money would you need if you wanted to buy two large fries?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>Katie was drawing on scrap paper. She could fit four drawings on each page. If she has nine pieces of paper, how many drawings can she make?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>Each table in a breakroom can seat nine people. If the breakroom has seven tables how many people can sit in there?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>There are six teams in the state trivia tournament. If each team has nine players, how many players are there total?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>A laundry mat washed two loads of towels with nine towels in each load. How many towels did they wash total?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>A teacher had six students in her classes. If each student completed four problems how many problems would she have to grade?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>Cody was packing up his old toys. He managed to squeeze six toys into a box. If Cody filled up three boxes, how many toys did he pack total?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>There were nine people in line waiting for movie tickets. If each of the tickets costs eight dollars, how much money would be spent?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>Wendy was practicing drawing pictures. Each day she drew for six hours. How many hours would she have practiced after seven days?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>Frank could fit six action figures on each shelf in his room. His room has nine shelves. How many action figures total could his shelves hold?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
<p>For his birthday Kaleb brought six boxes of cupcakes to school. If each box had eight cupcakes in it, how many cupcakes did he have total?</p>	$\underline{\quad} \times \underline{\quad} = \underline{\quad}$
