Daily Multiplication Practice

"Repetition creates the master." —Cesar Millan

Monday					
3 x 0 = 0					
3 x 1 = 3					
3 x 2 = 6					
3 x 3 = 9					
3 x 4 = 12					
3 x 5 = 15					
3 x 6 = 18					
3 x 7 = 21					
3 x 8 = 24					
3 x 9 = 27					
3 x 10 = 30					

Tuesday					
4 x 0 = 0					
4 x 1 = 4					
4 x 2 = 8					
4 x 3 = 12					
4 x 4 = 16					
4 x 5 = 20					
4 x 6 = 24					
4 x 7 = 28					
4 x 8 = 32					
4 x 9 = 36					
4 x 10 = 40					

Solve each word problem using multiplication. Write the number model and product for each.

Problem	Number Model
A store owner was buying uniforms for his employees. If each of his three stores needed four uniforms how many uniforms would he need?	___ x ___ = ___
An employee at a construction site earns four dollars an hour. If he works four hours in one week, how much money would he have earned?	___ x ___ = ___
The roller coaster at the state fair costs three tickets per ride. If six friends were going to ride the roller coaster, how many tickets would they need?	___ x ___ = ___
A pet store sold five gerbils in one week. If each of the gerbils cost four dollars, how much money would they have made?	___ x ___ = ___
A large order of fries at the soda shop costs three dollars. How much money would you need if you wanted to buy three large fries?	___ x ___ = ___
Katie was drawing on scrap paper. She could fit four drawings on each page. If she has seven pieces of paper, how many drawings can she make?	___ x ___ = ___
Each table in a breakroom can seat four people. If the breakroom has six tables how many people can sit in there?	___ x ___ = ___
There are five teams in the state trivia tournament. If each team has three players, how many players are there total?	___ x ___ = ___
A laundry mat washed three loads of towels with nine towels in each load. How many towels did they wash total?	___ x ___ = ___
A teacher had eight students in her classes. If each student completed four problems how many problems would she have to grade?	___ x ___ = ___
Cody was packing up his old toys. He managed to squeeze seven toys into a box. If Cody filled up three boxes, how many toys did he pack total?	___ x ___ = ___
There were four people in line waiting for movie tickets. If each of the tickets costs nine dollars, how much money would be spent?	___ x ___ = ___
Wendy was practicing drawing pictures. Each day she drew for eight hours. How many hours would she have practiced after three days?	___ x ___ = ___
Frank could three six action figures on each shelf in his room. His room has two shelves. How many action figures total could his shelves hold?	___ x ___ = ___
For his birthday Kaleb brought four boxes of cupcakes to school. If each box had two cupcakes in it, how many cupcakes did he have total?	___ x ___ = ___

Name _____
