

# May the F\*O\*RCE be with us!

September 16, 2014

Dear Parents,

As we work to learn about Force and Motion in Science, I have decided to give students the opportunity to earn some extra credit.

Students were given a "May the Force Be with Us" booklet today (September 16<sup>th</sup>). Different concepts about force and motion are described on each page. The students will be responsible for creating the illustrations to go on each page. Illustrations may be drawn by the student or they can use magazine clippings or pictures from the internet. The extra credit assignment is due by **Friday, September 26<sup>th</sup>**, and will be worth 2 test grades. Late projects WILL NOT be accepted. Please feel free to call or email me with any questions you may have.

Sincerely,  
Mrs. Burnette
