

Name \_\_\_\_\_

## Food Chain Study Guide

1. Producers are usually the first organisms listed in a food chain. They provide energy to the other organisms in the food chain.

Producers get energy from \_\_\_\_\_.

2. What do the arrows do in the food chain picture show?

3. **Grass** → **Ant** → **Lizard** → **Snake**

Below each component of the food chain above, label them as producers or consumers.

4. Which organisms get their energy by breaking down plants and animals that have already died?

5. List 3 examples of each organism:

Producers	Consumers	Decomposers

Draw a food chain of your chose below. (with atleast 5 components)

Below the food chain, explain what would happen if one of the organisms suddenly died off.
