Dream Team

Content Connections

Math & Science: In math, students will solve real-world word problems using multiplication and division and identify number patterns. In science, students will describe features of the Earth's surface.

ELA & Social Studies: Students will identify different text structures such as sequence of events, write an opinion piece of writing, identify adverbs, write analogies, and identify proper nouns. In SS, students will be able to identify the reasons that France, England, and Spain came to North America.

In Read 180, students will participate in independent reading, software, and small group. In small group, we will target specific reading/writing skills based on the needs of the group.
