

<p><b>1. PURPOSE</b> What do I want to find out?</p>	<p><b>TITLE</b> Make it interesting. Usually written in the form of a question</p>	<p><b>5. RESULTS</b> Make <u>observations</u>, <u>measure</u>, <u>classify</u>, and <u>communicate</u> this on a table, chart or graph. <b>(table, graph, or chart on back)</b></p>
<p><b>2. HYPOTHESIS</b> <u>Predict</u> what the outcome will be.  If _____ then, _____.</p>	<p><b>4. PROCEDURE</b> What are the steps I used for my investigation? Change one <u>variable</u> and keep the others the same.</p>	<p><b>6. CONCLUSION</b> <u>Communicate</u> the results of the experiment. See if your hypothesis was correct. <u>Infer</u> ideas from facts.</p>
<p><b>3. MATERIALS</b> What will I need to conduct my investigation?</p>	<p><b>PHOTOGRAPHS/ SUPPORTING GRAPHICS</b> How can I visually display what happened? (Attached or on the back) Draw what the experiment would look like.</p>
